**China's Outbound Tourism**

- Wolfgang Arlt - 2006-09-27

The People's Republic of China has changed from a country which actively discouraged tourism into one of the major source markets for the international industry; the 35 million Chinese travelling across the border in 2005 are merely the tip of the iceberg. China's Outbound Tourism is the first book on this major development and has been written using a multitude of sources from China and around the world. The topic is approached from many angles, using methods from the fields of economics, political sciences, sociology and cross-cultural studies. The book explains the economic and social background of the surge in tourism and the changes in policy in the country since 1949, when it moved from prevention through controlled development to encouragement of outbound travels. Throughout the book, facts and figures are given for the global development as well as in-depth information

destinations. The growing importance of tourists from China is however not just a question of quantity; the text explains the features which distinguish their travel motivations and behaviours from 'western' and Japanese tourists, and the consequences for product adaptation and marketing methods for destinations interested in attracting and satisfying Chinese tourists. Arlt's groundbreaking book cannot be ignored by professionals, academics and students of tourism and leisure; it offers fresh insight into the topic and indicates some of the future lines of development in this area.

**Urban Humanities** - Dana Cuff - 2020-04-07

Original, action-oriented humanist practices for interpreting and intervening in the city: a new methodology at the intersection of the humanities, design, and urban studies. Urban humanities is an emerging field at the intersection of the humanities, urban planning, and design. It offers a new approach not only for understanding cities in a global context but for intervening in them, interpreting their histories, engaging with them in the present, and speculating about their futures. This book introduces both the theory and practice of urban humanities, tracing the evolution of the concept,

practices with a wide range of research applications, describing changes in teaching and curricula, and offering case studies of urban humanities practices in the field. Urban humanities views the city through a lens of spatial justice, and its inquiries are centered on the microsettings of everyday life. The book's case studies report on real-world projects in mega-cities in the Pacific Rim—Tokyo, Shanghai, Mexico City, and Los Angeles—with several projects described in detail, including playful spaces for children in car-oriented Mexico City, a commons in a Tokyo neighborhood, and a rolling story-telling box to promote “literary justice” in Los Angeles.

### **Living Cities in Japan -**

Andre Sorensen - 2009

Over the last fifteen years local citizens' movements have spread rapidly throughout Japan. Created with the aim of improving the quality of the local environment, and of environmental management processes, such activities are widely referred to as machizukuri, and represent an important development in local politics and urban management in Japan. This volume examines the growth and nature of such civil society participation in local urban and environmental governance, raising important questions about the changing roles of and relations between central and local government, and between citizens and the state, in managing shared spaces. The machizukuri processes studied here can be seen as the focus of an

toward increased civic participation in managing processes of urban change in Japan. The contributors provide a comprehensive overview of the machizukuri phenomenon through examination not only of theory and history, but also of case studies illustrating real changes in the institutions of place making and neighbourhood governance. Living Cities in Japan will be of particular value to readers interested in social, urban, geographical and environmental studies.

**A Fatal Friendship** - Rosie

Llewellyn-Jones - 1985

The city of Lucknow, once described as "the last example of the old pomp and refinement of Hindustan", still remains one of the most interesting cities of north India. This lively urban history presents a panorama of the political, cultural, and architectural life of Lucknow during its heyday: from the ascendancy of the first nawab in the early 18th century to the deposition of the last nawab in 1856. Focusing on the architecture itself and the particular psychologies that lay behind the building facades, the author draws some intriguing conclusions about nawabi Lucknow and the colonial mind in its relation to Indian urban life.

Altaf Hussein, a young Muslim student, has been abducted from his college hostel. The authorities have washed their hands off the matter and the police are accused of a cover up. Rumours claim he has gone to fight the jihad in Iraq. More sinister rumours have him tortured and murdered for opposing the Nationalist

rampage to create a Hindu homeland in India, driving out Liberal supporters like Altaf and their decadent ideals. The divide between Liberals and Nationalists invades the Sengupta household in Kolkata when Joy, a bank manager, and Rohini, his schoolteacher wife-both compassionate humanists-learn the shocking news that their only son Bobby has become a leader of the Nationalist students and is implicated in Altaf's disappearance. Disbelief turns to anguish when they encounter his belligerent ideology and his not-too-convincing denial of his role in the Altaf affair. Out to solve the mystery of Altaf, Joy and Rohini discover conspiracy and hate, forbidden love and exceptional courage, come face to face with a world caught between the real and the ideal. But will they succeed in absolving their son of the heinous crime? Will Altaf be found after all? Or will they, and this fractured nation, pay the ultimate price for harbouring a fractured

### **Understanding Inorganic Chemistry - Remi Dalton - 2021-11-16**

The branch of chemistry which is concerned with the synthesis and analysis of inorganic and organometallic compounds is known as inorganic chemistry. The subject is further divided into organometallic chemistry, cluster chemistry and bioinorganic chemistry. The key feature of inorganic compounds is the absence of carbon-hydrogen bond in them. Inorganic compounds

cluster compounds, transition metal compounds, coordination compounds and bioinorganic compounds. Some common inorganic compounds are ammonia, chlorine, aluminum sulphate, ammonium nitrate, etc. Some common features of inorganic compounds are high melting point, ease of crystallisation, high specific heat capacity and poor electrical conductivity. Applications of inorganic chemistry are widespread ranging from agriculture, catalysis, medications to fuels and catalysis. The topics included in this book on inorganic chemistry are of utmost significance and bound to provide incredible insights to readers. While understanding the long-term perspectives of the topics, the book makes an effort in highlighting their impact as a modern tool for the growth of the discipline. Those in search of information to further their knowledge will be greatly assisted by this book.
