**DIN EN ISO 6892-1: Tensile test on metals | ZwickRoell**
The tensile test on metals or metallic materials, is mainly based on the standards DIN EN ISO 6892-1 and ASTM E8. Both standards specify specimen shapes and their testing. The objective of the standards is to define and establish the test method in such a way, that even when different testing systems are used, the characteristic values to be determined remain reproducible and ...

**ISO 8601 - Wikipedia**
ISO 8601 is an international standard covering the worldwide exchange and communication of date- and time-related data. It is maintained by the Geneva-based International Organization for Standardization (ISO) and was first published in 1988, with updates in 1991, 2000, 2004, and 2019. The standard aims to provide a well-defined, unambiguous method of representing ...
