Federal Regulation of Methadone Treatment - Committee on Federal Regulation of Methadone Treatment - 1995-02-01

For nearly three decades, methadone hydrochloride has been the primary means of treating opiate addiction. Today, about 115,000 people receive such treatment, and thousands more have benefited from it in the past. Even though methadone's effectiveness has been well established, its use remains controversial, a fact reflected by the extensive regulation of its manufacturing, labeling, distribution, and use. The Food and Drug Administration regulates the safety and effectiveness of methadone, as it does for all drugs, and the Drug Enforcement Administration regulates it as a controlled substance. However, methadone is also subjected to a unique additional tier of regulation that prescribes how and under what circumstances it may be used to treat opiate addiction. Federal Regulation of Methadone Treatment examines current Department of Health and Human Services standards for narcotic addiction treatment and the regulation of methadone treatment programs pursuant to those standards. The book includes an evaluation of the effect of federal regulations on the provision of methadone treatment services and an exploration of options for modifying the regulations to allow optimal clinical practice. The volume also includes an assessment of alternatives to the existing regulations.

Effective Promotional Planning for e-Business - Cathy Ace - 2012-05-16

'Effective Promotional Planning for e-Business' is an introductory text for those who need to gain a practical insight into promotional planning and implementation for e-businesses. Using a range of case studies from around the world, the book illustrates current practice in marketing communications, looking at both start ups and e-business solutions from existing organizations. It covers product, service, business to consumer, business to business, UK, transatlantic and global communications issues, both internally and externally. The book also addresses specific issues such as: · Developing traffic · Making sites more sticky · Ensuring best possible CRM, partner communications, internal communications and motivation · Co-ordinating your tactics alongside traditional brand building With its user-friendly layout and an accompanying website that includes presentation material, additional questions, case studies and updated web links, 'Effective Promotional Planning for e-Business' is the essential guide to this area. It is ideal for all marketing communications executives and managers who need a practical text to help them to prepare a workable marketing communications programme for an e-business operation.

Fordney's Medical Insurance and Billing - E-Book - Linda Smith - 2021-10-27

Gain the medical insurance skills you need to succeed in today's outpatient and inpatient settings! Fordney's Medical Insurance and Billing, 16th Edition helps you master the insurance billing specialist's role and responsibilities in areas such as diagnostic coding, procedural coding, billing, and collection. Using clear, easy-to-understand explanations, this book covers all types of insurance coverage commonly encountered in hospitals, physicians' offices, and clinics. Step-by-step guidelines lead you through medical documentation and administrative procedures. Written by coding specialist and educator Linda M. Smith, this market-leading text is a complete guide to becoming an efficient insurance billing specialist. Coverage of medical documentation, diagnostic coding, and procedural coding provides you with the foundation and skills needed to work in a physician's office as well as outpatient and inpatient settings. Coverage of the role and responsibilities of the insurance billing specialist emphasizes advanced job opportunities and certification. Step-by-step procedures detail common responsibilities of the insurance billing specialist and coder. Key terms and abbreviations are defined and emphasized, reinforcing your understanding of new concepts and terminology. Color-coded icons denote and clarify information, rules, and regulations for each type of payer. Privacy, Security, and HIPAA chapter and Compliance Alerts throughout the book highlight important HIPAA compliance issues and regulations. UNIQUE! Interactive UB-04 Form filler on the Evolve website gives you additional practice with inpatient electronic health records. NEW! Insights From The Field includes short interviews with insurance billing specialists who have experience in the field, providing a snapshot of their career paths and offering advice to the new student. NEW! Scenario boxes help you apply concepts to real-world situations. NEW! Quick Review sections summarize chapter content and also include review questions. NEW! Discussion Points provide the opportunity for students and instructors to participate in interesting and open dialogues related to the chapter's content. NEW! Expanded Health Care Facility Billing chapters are revised to provide the latest information impacting the insurance billing specialist working in a variety of healthcare facility settings.

The Army's Optionally Manned Fighting Vehicle (OMFV) Program - Andrew Feikert - 2019-10-21

In June 2018, in part due to congressional concerns, the Army announced a new modernization strategy and designated the Next Generation Combat Vehicle (NGCV) as the program to replace the M-2 Bradley. In October 2018, Army leadership decided to redesignate the NGCV as the Optionally Manned Fighting Vehicle (OMFV) and to add additional vehicle programs to what would be called the NGCV Program. The M-2 Bradley, which has been in service since 1981, is an Infantry Fighting Vehicle (IFV) used to transport infantry on the battlefield and provide fire support to dismounted troops and suppress or destroy enemy fighting vehicles. Updated numerous times since its introduction, the M-2 Bradley is widely considered to have reached the technological limits of its capacity to accommodate new electronics, armor, and defense systems. Two past efforts to replace the M-2 Bradley-the Future Combat System (FCS) Program and the Ground Combat Vehicle (GCV) Program-were cancelled for programmatic and cost-associated reasons. In late 2018, the Army established Army Futures Command (AFC), intended to establish unity of command and effort while consolidating the Army's modernization process under one roof. AFC is intended to play a significant role in OMFV development and acquisition. Hoping to field the OMFV in FY2026, the Army plans to employ Section 804 Middle Tier Acquisition Authority for rapid prototyping. The Army plans to develop, in parallel, three complementary classes of Robotic Combat Vehicles (RCVs) intended to accompany the OMFV into combat both to protect the OMFV and provide additional fire support. For RCVs to be successfully developed, technical challenges with autonomous ground navigation may need to be resolved and artificial intelligence likely must evolve to permit the RCVs to function as intended. The Army has stated that a new congressionally granted acquisition authority-referred to as Section 804 authority-might also be used in RCV development. The Army requested \$219 million in Research, Development, Test, and Evaluation (RDT&E) funding for the OMFV program and \$160 million in RDT&E funding for the RCV in its FY2020 Budget Request. FY2020 National Defense Authorization Act (H.R. 2500) authorizes an additional \$ 6 million for OMFV RDT&E. H.R. 2500 also authorizes an additional \$10 million for RCV RDT&E. FY2020 National Defense Authorization Act (S. 1790) authorizes an additional \$15 million for OMFV RDT&E. S. 1790 also authorizes an additional \$25 million for RCV RDT&E. The Department of Defense Appropriation Act, 2020 (H.R. 2968), appropriates an additional \$32 million for OMFV RDT&E. H.R. 2968 appropriates an additional \$55 million for RCV RDT&E. S. 2474 appropriates an additional \$26 million for OMFV RDT&E. S. 2474 decreases the RCV RDT&E funding by \$46.621 million.
