**Pediatric Nursing Care Plans** - Assuma TM Beevi - 2012-08-31

**Pediatric Nursing Care Plans** - Assuma TM Beevi - 2012-08-31

**Care Planning in Children and Young People's Nursing** - Doris Corkin - 2011-11-07

Care Planning in Children and Young People's Nursing addresses a selection of the most common concerns that arise when planning care for infants, children and young people within the hospital and community setting. Clear and detailed, this text reflects both the uniqueness and diversity of contemporary children's nursing and utilizes images and case studies to provide a holistic insight into the practice of care planning through the reporting of best available evidence and current research. Divided into sections for ease of reference, Care Planning in Children and Young People's Nursing explores both the theory and practice of care planning. Chapters on the principles of care planning include issues such as managing risk, safeguarding children, ethical and legal implications, integrated care pathways, interprofessional assessment, and invaluable parent perspectives. Additional chapters on the application of planning care examine the practical aspects of a wide range of specific conditions including cystic fibrosis, obesity, cardiac/renal failure and HIV/AIDS. Each chapter is interactive, with questions, learning activities and points for discussion creating an engaging and enquiry-based learning approach. Care Planning in Children and Young People's Nursing is a definitive resource, reflecting innovative practice which is suitable for undergraduate and postgraduate nurse education.

**Nursing Care of the Critically Ill Child** - Mary Fran Hazinski - 2013

Now completely up to date to meet the needs of today's pediatric nurses, Mary Fran Hazinski's Nursing Care of the Critically Ill Child, 3rd Edition, remains the foundational text of pediatric critical care nursing. Known for its outstanding organization and clear descriptions, this comprehensive reference details the unique care required for critically ill children with thorough discussions of physiology, pathophysiology, pharmacology, collaborative management, and nursing management. Ten new chapters, new advanced practice content, and new nurse contributors and reviewers ensure that this classic text continues to be the essential resource for the care of critically ill children. Details differences in caring for critically ill children as compared with caring for adults: how to modify assessment procedures, consider aspects of psychosocial development, and examine developmental aspects of various body systems. Provides comprehensive coverage of physiology, pathophysiology, pharmacology, and nursing management related to care of the critically ill child. Includes detailed Nursing Care Plans for select disorders. Contains helpful appendices such as pediatric drug dosages, central venous catheter care, and pediatric fluid requirements. Features Evolve online resources with additional content for further study of related topics, including tables for ease of recollection of material and additional references. Contains 10 all-new chapters, including Pharmacokinetics and Pharmacodynamics; Shock, Cardiac Arrest, and Resuscitation; Mechanical Support of Cardiopulmonary Function; Fluid, Electrolyte, and Endocrine Problems; Immunology and Infectious Disorders; Transplantation and Organ Donation; Toxicology/Toxins; Fundamentals of Quality Improvement and Patient Safety; Clinical Informatics; and Ethical Issues in Pediatric Critical Care.

**All-in-One Nursing Care Planning Resource** - Pamela L. Swearingen - 2015-02-02

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-in-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternal/obstetrics, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color
The new edition of Nursing Care Planning Made Incredibly Easy is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

Pediatric Nursing Care Plans for the Hospitalized Child - Sharon Ennis Axton - 2009

All-in-One Nursing Care Planning Resource - Pamela L. Swearingen - 2012

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatrics, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Nursing Care Planning Made Incredibly Easy! - Lippincott Williams & Wilkins - 2012-07-02

Maternal Newborn Nursing Care Plans - Carol J. Green - 2015-01-05

Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

All-in-One Nursing Care Planning Resource - E-Book - Pamela L. Swearingen - 2019-01-14

Introducing a plan for success with the only nursing care planning reference book for all core clinical areas! Swearingen’s All-In-One Nursing Care Planning Resource, 5th Edition, features over 100 core plans including medical-surgical, OB and maternity, pediatric, and psychiatric-mental health to help you care for patients in any setting. This new edition is the first in the market to include a unique, interprofessional, “patient problem” focus that teaches students how to speak to patients in conversational terms rather than in nursing-specific language. New non-medical-surgical care plans and updated content throughout reflect the latest evidence-based treatment guidelines for national and international clinical practice. Plus, with its clear approach, easy-to-use format, and straightforward rationales, you can use this one book throughout their entire nursing curriculum! Bolded and highlighted Safety Icons correspond to the safety competency of the Quality and Safety Education for Nurses (QSEN) initiative for easier recognition. Care plans for all four major clinical areas include medical-surgical, OB and maternity, pediatric, and psychiatric-mental health nursing care plans. A consistent format for each care plan enables you to perform faster searches, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Patient Problems, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized patient problems are listed in order of importance and physiologic patient needs. Detailed rationales for each nursing intervention help you apply concepts to specific patient situations in clinical practice. Full-color design makes the book more user friendly and includes color-coded tabs and improved cross-referencing and navigation aids for faster information retrieval. NEW! UNIQUE! Interprofessional “patient problems” focus familiarizes you with how to speak to patients and other medical colleagues in the consistent interprofessional language of “patient problems,” rather than the nursing-specific language of nursing diagnosis. NEW! Care plans helps you to support the lesbian, gay, bisexual, transgender, queer/questioning, or intersex patient. NEW! Updated content throughout reflects the latest evidence-based treatment guidelines and national and international clinical practice guidelines.

Nursing Care Planning Guides for Children - Cindy Smith Greenberg - 1998
the bound book. Updated in an all new 3rd edition, Pediatric Care Plans for the Hospitalized Child is an essential guide to preparing individualized care plans tailored to meet the special needs of the non-critical, hospitalized child. This book provides a quick reference for correlating pediatric medical diagnoses with nursing diagnoses, and will serve as a valuable tool in the clinical setting. A unique thirteen-part format provides care plans that are organized by medical diagnoses with six corresponding nursing diagnoses for each medical diagnosis. In this edition, nursing care plans are situated in tables instead of text, making it much easier for the reader to understand and access.

Pediatric Nursing Care Plans for the Hospitalized Child - Susan L Ward - 2013-10-16

This concise guide delivers all the practical information you need to care for children and their families in diverse settings. It clearly explains what to say and what to do for a broad range of challenges you may encounter in clinical practice. You’ll examine the anatomy and physiology of body systems along with common childhood conditions and disease processes, including critical nursing assessments, signs and symptoms, treatment procedures, laboratory work-ups, medications, and other important aspects of care. Strategies for advocacy, effective communication techniques, identification of potentially life-threatening issues, and advice from experienced pediatric nurses guide you every step of the way.

Manual of Psychiatric Nursing Care Planning - Elizabeth M. Varcarolis - 2011

Pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcarolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany Foundations of Mental Health Nursing, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and
Manul of Psychiatric Nursing Care Planning - Elizabeth M. Varcarolis - 2011
A pocket-sized clinical companion, Manual of Psychiatric Nursing Care Planning, 4th Edition helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design nursing interventions for inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current nursing diagnoses, diagnostic procedures, surgical interventions, and suggested nursing diagnoses for over 1,300 client symptoms, medical and psychiatric diagnoses, diagnostic procedures, surgical interventions, and clinical states. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) information to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. You! Provides care plans for every NANDA-I approved nursing diagnosis. Allows quick access to specific symptoms and nursing diagnoses with alphabetical thumb tabs. Unique! Includes a Care Plan Constructor on the companion Evolve website for hands-on practice in creating customized plans of care. Includes the new 2009-2011 NANDA-I approved nursing diagnoses including 21 new and 8 revised diagnoses. Illustrates the difference between the three types of nursing diagnoses. Expands information explaining the difference between actual and potential problems in performing an assessment. Adds detailed information on the multidisciplinary and collaborative aspect of nursing and how it affects care planning. Shows how care planning is used in everyday nursing practice to provide effective nursing care.

Using this convenient resource to formulate nursing diagnoses and create individualized care plans! Updated with the most recent NANDA-I approved nursing diagnoses, Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 9th Edition shows you how to build customized care plans using a three-step process: assess, diagnose, and plan care. It includes suggested nursing diagnoses for over 1,300 client symptoms, medical and psychiatric diagnoses, diagnostic procedures, surgical interventions, and clinical states. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) information to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Delmar's Pediatric Nurse Care Plans (Book Only) - Karla L. Luxner - 2004-08-09
Delmar's Pediatric Nursing Care Plans, Third Edition, provides detailed information on developing care plans for children with health alterations. Each care plan presents information to guide users in developing comprehensive, individualized nursing care plans based on solid, scientific knowledge. Care plans solicit specific client data and prompt the user to individualize the interventions and evaluate the child's individual responses. Interventions and outcomes are suggested to keep parents informed of and involved in their child's care.

Delmar's Pediatric Nurse Care Plans (Book Only) - Karla L. Luxner - 2004-08-09
Delmar's Pediatric Nursing Care Plans, Third Edition, provides detailed information on developing care plans for children with health alterations. Each care plan presents information to guide users in developing comprehensive, individualized nursing care plans based on solid, scientific knowledge. Care plans solicit specific client data and prompt the user to individualize the interventions and evaluate the child's individual responses. Interventions and outcomes are suggested to keep parents informed of and involved in their child's care.

Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.
Help students provide appropriate, individualized care for each child. Accompanying CD-ROM has nursing care plans, a customizable psychosocial assessment tool, and monographs about psychotropic drugs.

Wong's Essentials of Pediatric Nursing - Binder Ready - Marilyn J. Hockenberry - 2016-09-26

Binder-Ready Edition: This loose-leaf copy of the full text is a convenient, accessible, and customizable alternative to the bound book. With this binder-ready edition, you can personalize the text to match your unique study needs! Known for its accuracy, evidence-based focus, and engaging writing style, Wong’s Essentials of Pediatric Nursing, 10th Edition has been the #1 title in the pediatric nursing market since it first published in 1980! Thoroughly revised to equip you with the latest research and guidelines for treating children today, it encourages a whole-body approach by beginning with child development and health promotion to better understand the later chapters on specific health problems. A new chapter featuring all systems cancers provides comprehensive information in one place. Nursing Care Plans now incorporate additional case studies to personalize interventions and promote critical thinking. A developmental approach clearly identifies key tasks, influences, and differences at each stage of a child’s growth to help students provide appropriate, individualized care for each child.

UNIQUE! Critical thinking case studies?allow you to test and develop your analytical skills in a variety of clinical situations. UNIQUE! ?Quality Patient Outcomes?content?in?Nursing Care Management?discussions for major diseases and different roles that influence child care, enhancing your ability to provide quality nursing care to ALL children and their families. UNIQUE! Family focus?includes a separate chapter on the role of the family in child health, family content throughout the text, and?Family-Centered Care?boxes that highlight information on patient teaching, home care, and incorporating the family in the child’s care. UNIQUE! Translating Evidence into Practice boxes focus your attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. UNIQUE! ?Atraumatic Care?boxes guide you through performing procedures in a caring manner, promoting more positive experiences for children, families, and nurses.

Drug Alerts?throughout the text emphasize important drug information and point out potential safety issues. An emphasis on wellness?offers health promotion and injury prevention strategies for each age group. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Nursing Care Plans, including Nursing Diagnoses, Patient/Family Goals, Nursing Interventions/Rationales, and Expected Outcomes, provide you with a model for planning patient care. Research Focus boxes help you remain abreast of current studies that impact pediatric nursing today. Cultural content, integrated throughout the text and highlighted in Cultural Considerations boxes, exposes you to customs and beliefs of different cultures that influence child care, enhancing your ability to provide quality nursing care to ALL children and their families. Nursing Tips throughout the text offer helpful hints and practical, clinical information of a non-emergency nature. Nursing Alerts throughout the text provide you with critical information that must be considered in providing care. UNIQUE! Emergency Treatment boxes serve as a quick reference in critical situations. Nursing Care Guidelines boxes provide you with clear, step-by-step detailed instructions for performing specific skills or procedures. NEW! Updated content throughout, notably methods of measuring competency and outcomes (QSEN and others), ambiguous genitalia, pediatric measurements, guidelines, and standards as defined by the American Academy of Pediatrics, and clear definitions of adolescent and young adult, keeps you up-to-date on important topic areas. NEW! The Child with Cancer chapter includes all systems cancers for ease of access. NEW and UPDATED! Case Studies now linked to Nursing Care Plans to personalize interventions, while also providing questions to promote critical thinking.

An outstanding resource for students and practicing nurses, the Ninth Edition of Lippincott’s Manual of Psychiatric Nursing Care Plans contains 52 nursing care plans that address the most commonly encountered behaviors in psychiatric-mental health nursing. An excellent tool to introduce students to clinical psychiatric experience, the Manual demonstrates use of the nursing process in psychiatric nursing and gives suggestions for specific interventions—whether general or particular behaviors, giving the student a sound basis on which to build clinical skills. Covering a range of problems and a variety of approaches, the care plans are meant to be adapted and individualized in planning nursing care for each client. The Ninth Edition has been thoroughly updated and includes new information on complementary and alternative medicine and using the internet; as well as new or expanded appendices on psychopharmacology; side effects of medications and related nursing interventions; and schizoid, histrionic, narcissistic, and avoidant personality disorders.

Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Ulrich & Canale’s Nursing Care Planning Guides - E-Book - Nancy Haugen - 2010-08-30
Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer’s Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson’s Disease, and Total Parenteral Nutrition.
